Subject: Updated Regulations Under California's Proposition 65

Dear Valued Customer,

We are in receipt of your letter relating to the Safe Drinking Water and Toxic Enforcement Act of 1986 ("Proposition 65") and certain Mar-Bal, Inc. products. As you are aware, Proposition 65 requires businesses to warn consumers in California before exposing them to specific levels of chemicals known to cause cancer, birth defects or other reproductive harm. California recently modified Proposition 65 regulations regarding warning labels. The modifications, which go into effect on August 30, 2018, call for a new warning symbol and for new and more specific warning labels on products. But these regulatory changes *do not affect which products must be labeled.*

We have been following the regulatory changes to Proposition 65 closely. However, we do not currently label any products with Proposition 65 warnings, because none of our products contain Proposition 65 chemicals in concentration levels that would require a warning label. We will continue to monitor both Proposition 65 and our products, and we will communicate any material changes to you, should our position change in the future.

If you have any questions on this subject, please don't hesitate to contact me.

Respectfully,
